

NH₃ Trial
2014 Corn in Illinois
Farm Research Results

Planted: 5/15/2014
Harvested: 9/23/2014
Hybrid: DK 6208
Soil: Clay, Loam
Previous Crop: Soybeans

Plot Size: 4 rows, 27.5', 30", 4 replications
Tillage Type: Conventional
Irrigation: None
Rainfall: 25.44 inches
Population: 34,000 plants per acre

Fertilizer Applied: Fall applied NH₃ at 100 pounds acre, Side dressed at 100 pounds per acre
Herbicide: Lumax 2.5 quart per acre
Insecticide: Force 3G in Furrow

1= Best
10= Worst
