

PH K

Guaranteed Analysis

Active Ingredients:

Humic Acid: 70%

Total Other Ingredients (inert): 30%

This Product:

- Is a dry granular humate product containing a proprietary carrier, providing a quicker release of these organic acids for conventional and organic application.
- Comes in three different three sgn sizes: 100, 150, 200
- Is non-toxic, safe to handle and contains no microbes or bacteria
- Is compatible with most dry conventional and organic products. A physical compatibility test is recommended.
- Should be used within the growing season for which it was purchased
- Can be applied to most soils
- **Do not mix when PH K or other dry products are wet**
- **Specific to conventional use: DO NOT USE WITH UREA**

100 - 150 - 200

RECOMMENDED APPLICATION RATE:

Apply PH K 100 through insecticide or gandy boxes at 5 to 10 pounds per acre per planter instructions below. Apply PH K 150 and PH K 200 through gandy box or broadcast at 25 to 125 pounds per acre. For agronomic application rates suitable for your crop, geographic area and soil type, consult a trained specialist and apply as needed based on a soil test, tissue analysis and/or according to recommendations in your SoilBiotics Crop Management Plan.

Planter Settings for PH K 100

Application Equipment	5 MPH	Speed	5.5 MPH
John Deere 7000 Odd Notches (5-15-25-35)	18		19
John Deere 7000 Even Notches (10-20-30-40)	26		29
Kinze (New)	27		29
John Deere Max-Emerge Plus	37		41

PH K can be applied once or multiple times a year. It is preferred to apply PH K 100 through insecticide or planter boxes. Maximum spread with spinner spreader is approximately 20 feet with PH K 150 and 60 feet with PH K 200.
