

# THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

SEPTEMBER 2022

## SOIL BOOST Fall Discount Program

It's once again time to lock in your order for one of our most popular products, **Soil Boost**. This high-quality Humic product increases nutrient availability by solubilizing soil-bound nutrients, sequestering excess soil nutrients, and rebalancing the soil naturally. It is sold in rough, granular form for broadcast application post-harvest (or pre-plant). It also contributes to better soil health by improving soil crumbling, increasing aeration, and improving water retention.

**Starting October 1 and running through the end of November 2022, we are offering a special Fall discount of 5% off any order for Soil Boost, regardless of order size. No other discounts apply to this exclusive offer. Soil Boost is available in 50 lb. bags or 1-ton bulk bags.**

So, mark your calendars or set your digital reminder for October 1st and don't miss this opportunity!

## Overwintering N

Putting down N in fall strip-till? Talk to us about **OS 46**. This is a unique blend of high-quality 46-0-0 urea and SoilBiotics Humic product, a combination which remains in the soil for months and will be there for the plants in the spring. Conventional fall N applications face large nitrification losses over the winter; in some instances, as much as 40%.

## Break It Down! Reap the Benefits!

Don't forget to ask us about our SB Digester products, which are seeing very good results. This is a low-cost way to improve soil Organic Matter content by conserving what you already have! **This is a terrific way to reduce the need for added nutrients next spring and improve your bottom line before you even put the first seed in the ground!**
