SoilBiotics products make a big difference in 2016 Ohio organic winter Wheat crop

SoilBiotics' products made a big difference in yield with great results in this Ohio organic winter Wheat crop. According to SoilBiotics consultant Doug Billman, CCA, of Twinbill Agricultural Services in Burbank, OH, the grower utilized an early spring applied combination of 1 pound per acre of **Organic 4r – Foliar Concentrate** and five gallons per acre undiluted **eFISHnt 5-1-2**. The result was a great stand as shown in image A, very good grain fill in Image B, and high-quality wheat in Image C.
