

RESEARCH FOR RESULTS

SoilBiotics products make a big difference in 2016 Ukrainian organic Sunflower crop!

SoilBiotics products helped with substantial yield and profit results for another one of our Ukrainian growers, in this case sunflowers. The Chysta Krynytsia farmstead is located in the Poltava region of Ukraine, and is approximately 60K hectares in size. According to SoilBiotics distributor representative of Oleksiy Khvorostyan of Argus LTD., the grower utilized a post-emergence foliar application of SoilBiotics **Organic 4r – Foliar Concentrate** at a rate of 500 grams per hectare. The result was a +200 kilogram per hectare increase in yield vs. the control.

The SoilBiotics-treated sunflowers yielded an increase of 1,800 UAH (Ukrainian Hryvnia @ .040 per \$U.S., or an increase of \$72 per ton. Great results!
