SoilBiotics product turns around a troubled Ukrainian Barley crop!

SoilBiotics **Organic 4r – Foliar Concentrate** turned around a failing barley crop for a Ukrainian grower. According to our SoilBiotics distributor representative, unusually cold and snowy spring weather has been wreaking havoc with crops throughout Ukraine and this barley crop was no exception (Images A & B). The grower was advised to make a foliar application of **Organic 4r – Foliar Concentrate**. Seven days later the resulting turnaround was phenomenal (Images C & D). Great green-up and much lusher, fuller plant growth.
