SoilBiotics products make a big difference in 2015 Broccoli crop

SoilBiotics' products are making a big difference in yield with markedly better results in this California Broccoli crop. A substantially larger stalk size and root system is indicated (as shown on the right of image A), increasing overall yield. Image B shows the smaller control crop plants on the left and SoilBiotics treated plants on the right.

A

B

The SoilBiotics program consisted of the following products & amounts, delivered through a drip irrigation system:

- 14 pounds per acre of organic Nitrogen
- 1 gallon per acre of **Organic 3r - Growth Boost**
- 1 gallon per acre of **CAL-10**
