

RESEARCH FOR RESULTS

SoilBiotics **Organic 1r – Seed Treatment** a hit in 2018 California corn trial

SoilBiotics **Organic 1r – Seed Treatment** performed very well in a 2018 corn trial at an organic ranch in Hollister, CA. The SoilBiotics treated corn rows are the first four rows on the right (as seen in Image A). The untreated control rows are the next four rows to the left. The SoilBiotics treated plants are significantly larger and fuller.

2018 side-by-side seed treatment trial:
