

# THE DIRT!

SOILBIOTICS COMPANY E-NEWSLETTER

NOVEMBER 2020

## Time to Think About Seed Treatment

SoilBiotics **Organic 1r - Seed Treatment** has been shown to be a top performer when tested against a variety of both organic and conventional competitors. This is an easy to use stand-alone seed treatment that is compatible with most other organic seed treatments. **Organic 1r - Seed Treatment** may be applied up to 5 months prior to use. It is formulated to improve the early stages of plant life, reducing insect and disease pressure for better plant health and improved yields.

**Seed Start 200** is a recent addition to our seed treatment line that contains a unique combination of Humic Acid (10.5%) along with a consortium of living breathing micro-organisms designed to boost plant and soil microbial activity. This product has also performed quite well in multi-state seed treatment trials!

## Downed Corn Will Need Extra Effort to Breakdown

The derecho that swept through the Midwest this summer, plus other assorted storms, has caused growers another headache beyond loss of crops. All of the biomass laying on the ground needs to be broken down by various means in order to avoid problems next spring, and growers will want to retain the valuable nutrients through the winter. Stalks and corn ears need to be chopped into the smallest possible form. Talk to SoilBiotics about adding **SB5500** to your residue management program to accelerate crop residue breakdown via microbes that specialize in decomposition, plus add **3 - Growth Boost** (conventional) or **Organic 3r - Growth Boost** (organic) to support the microbial activity of the **SB5500** by acting as another food source. For a great example of how a SoilBiotics Residue Digester Program can benefit your soil, a recent grower result for a SoilBiotics digester program resulted in an across-the-board increase in all measured constituents for soil fertility at minimal cost per acre.

If you would like to see the actual soil test, visit our website at:

## There's Still Time to Take Advantage of the 10th Anniversary Discount Program and Build Your Soil in Time for The Next Crop

Fall is the time to apply **Organic 2r – Soil Boost** for both conventional and organic fields to help rebuild soil structure. As a part of our 10th Anniversary celebration, we are offering 10% off all **Organic 2r – Soil Boost** purchases placed September through November this year, with all orders to ship no later than end of November. **Organic 2r – Soil Boost** is a high quality humic product that increases nutrient availability by solubilizing soil bound nutrients and sequestering excess soil nutrients.

## Holiday Note

We are thankful for another fruitful year and for having all of you as our customers. We send holiday greetings to you and yours, and say a prayer for safe travels and warm family time together.

The SoilBiotics offices will close at noon on Wednesday, November 25 and be closed Thursday and Friday, November 26 and 27.
